

Fruit Beers

This broad beer category has plenty of different competing beer styles from light refreshing kolshs to sweet cream ales as the underlying beer that the brewer then tries to marry with the flavour of fruit. The best examples try to balance these components. The Bow River Cherry-Raz Wit has a medium-light body with an expressive nose. It's refreshing and the tartness of raspberry puree comes off the back end just right to balance this beer. *John Papavacilopoulos*
